

Conditioning tensors

Historical PM2.5

$x_t: B \times 168$

Origin context

$q_t: B \times 85$

Retrieval summary

$\rho(G_t): B \times 51$

Drift components + score

$d_t: B \times 6$

Future calendar

$c_{t+h}: B \times 9$

Forecast paths

24 direct XGBoost
regressors (M09)

$B \times 151 \rightarrow B \times 24$

Unreported gate
rerun required

$D_t \in \{0,1\}$

Frozen Chronos-Bolt

$B \times 168 \rightarrow B \times 24$

Forecast-level fusion

$\omega=0.75$

$\hat{Y}_t$

Two verified forecast variants; the drift gate awaits a complete rerun
